NXDN™ Forum Announces Further Member Expansion

Suwanee, GA – March 29, 2013 - The Chair of the NXDN™ Forum announced the addition of seven new members to the Forum.

Seven new members joined the NXDN™ Forum. These new member companies are; CVDS, Inc., Compliance Testing, LLC, Eventide Inc., HigherGround, Inc., Timco Engineering Inc., UL Verification Services and Ultratech Group of Labs.

These new members comprise a number of industry leading two-way radio application solution providers and radio conformance test labs. As the number of NXDN™ radio equipment manufacturers are increasing and the resulting estimated one million plus NXDN™ terminals and infrastructure already in the market has increased the requirement for applications as well as professional test house services to conduct interoperability testing.

The NXDN™ Forum now has 34 member companies who provide a depth of versatility in products and services for the NXDN™ platform.

The NXDN™ Forum was established in July, 2008 with eight founding members including Kenwood Corporation, Icom Incorporated, Kenwood USA Corporation, Icom America Incorporated, Aeroflex Wichita Inc., Daniels Electronics Ltd., Ritron Inc. and Trident Datacom Technologies, Inc. d/b/a Trident Micro Systems. The Forum was established for the promotion of the NXDN™ digital air protocol for use with 6.25 kHz and 12.5 kHz narrowband technology.
